A. White paper

B. Corrugated paper

C. Bubble paper

D. EPE

E. EVA

F. Three layer Corrugated paper master carton

G. Five layer Corrugated paper master carton

H. Seven layer Corrugated paper master carton

I. Styrofoam

J. White Box

K. Color Box

L. Paper Sleeve

M. Pvc Box

N. Gift Box

R. Wooden Pallet

Q 1. What is the difference between a master carton and a retail carton?

A A master carton is a large box used for shipping multiple units of a product, while a retail carton is a smaller box used for individual units of a product.

Q 2. What is the difference between a three layer and a five layer corrugated paper?

A A three layer corrugated paper has three layers of paper, while a five layer corrugated paper has five layers of paper. The five layer paper is stronger and more durable than the three layer paper.

Q 3. What is the difference between a color box and a white box?

A A color box is a box that is printed with a color design, while a white box is a plain white box. Color boxes are more expensive than white boxes, but they are more attractive and can help to differentiate a product from its competitors.

Q 4. What is the difference between a paper sleeve and a paper box?

A A paper sleeve is a thin, flat piece of paper that is used to wrap around a product, while a paper box is a three-dimensional container. Paper sleeves are used for products that are not fragile and do not require a rigid container.

Q 5. What is the difference between a DHL, UPS, and TNT shipping service?

A DHL, UPS, and TNT are all major shipping services. DHL is known for its fast international shipping, UPS is known for its reliable domestic shipping, and TNT is known for its fast international shipping. Each service has its own strengths and weaknesses, and the choice of service depends on the specific needs of the customer.

Q 6. What is the difference between BV, FDA, LFGB, and CP65 certification?

A BV, FDA, LFGB, and CP65 are all certification standards. BV is a certification standard for food safety, FDA is a certification standard for food safety and drug safety, LFGB is a certification standard for food safety, and CP65 is a certification standard for food safety. Each certification standard has its own requirements and procedures.
