N. Gift Box

R. Wooden Pallet

Q 1. What is the difference between a master carton and a retail carton?

A A master carton is a large box used for shipping multiple units of a product, while a retail carton is a smaller box used for individual units of a product.

Q 2. What is the difference between a three layer and a five layer corrugated paper?

A A three layer corrugated paper has three layers of paper, while a five layer corrugated paper has five layers of paper. The five layer paper is stronger and more durable than the three layer paper.

Q 3. What is the difference between a color box and a white box?

A A color box is a box that is printed with a color design, while a white box is a plain white box. Color boxes are used for products that require a specific look or branding, while white boxes are used for products that do not require a specific look or branding.

Q 4. What is the difference between a paper sleeve and a paper box?

A A paper sleeve is a thin, flat piece of paper that is used to wrap around a product, while a paper box is a three-dimensional container used to hold a product. Paper sleeves are used for products that are fragile or need extra protection, while paper boxes are used for products that are sturdy and can be stacked.

Q 5. What is the difference between a DHL, UPS, and TNT shipping service?

A DHL, UPS, and TNT are all major shipping services. DHL is known for its fast international shipping, UPS is known for its reliable domestic shipping, and TNT is known for its fast international shipping. Each service has its own strengths and weaknesses, and the choice of service depends on the specific needs of the customer.

Q 6. What is the difference between BV, FDA, LFGB, and CP65 certification?

A BV, FDA, LFGB, and CP65 are all certification standards. BV is a certification standard for product quality, FDA is a certification standard for food safety, LFGB is a certification standard for food safety, and CP65 is a certification standard for product quality. Each certification standard has its own requirements and benefits.
