Q 1. What is the difference between a master carton and a retail carton?

A A master carton is a large box used for shipping multiple units of a product, while a retail carton is a smaller box used for individual units of a product.

Q 2. What is the difference between a three layer and a five layer corrugated paper?

A A three layer corrugated paper has three layers of paper, while a five layer corrugated paper has five layers of paper. The five layer paper is stronger and more durable.

Q 3. What is the difference between a color box and a white box?

A A color box is a box with a printed design or image, while a white box is a plain white box. Color boxes are used for branding and marketing, while white boxes are used for shipping and protection.

Q 4. What is the difference between a paper sleeve and a paper box?

A A paper sleeve is a flat piece of paper that is used to wrap around a product, while a paper box is a three-dimensional container used for shipping and protection.

Q 5. What is the difference between a DHL, UPS, and TNT shipping service?

A DHL, UPS, and TNT are all major shipping services. DHL is known for its fast international shipping, UPS is known for its reliable domestic shipping, and TNT is known for its fast international shipping.

Q 6. What is the difference between BV, FDA, LFGB, and CP65 certification?

A BV, FDA, LFGB, and CP65 are all certification standards. BV is a certification standard for product quality, FDA is a certification standard for food safety, LFGB is a certification standard for food safety, and CP65 is a certification standard for product quality.
