H. Seven layer Corrugated paper master carton

I. Styrofoam

J. White Box

K. Color Box

L. Paper Sleeve

M. Pvc Box

N. Gift Box

R. Wooden Pallet

Q 1. What is the difference between white paper and white box?

A White paper is a single layer of paper, while a white box is made of multiple layers of paper, including a corrugated middle layer for strength.

Q 2. What is the difference between three layer and five layer corrugated paper?

A Three layer corrugated paper has three layers of paper, while five layer corrugated paper has five layers, providing more strength and durability.

Q 3. What is the difference between a color box and a white box?

A A color box is printed with various colors and designs, while a white box is plain white. Color boxes are often used for gift boxes or premium products.

Q 4. What is the difference between a paper sleeve and a paper box?

A A paper sleeve is a simple, flat piece of paper used to wrap around a product, while a paper box is a three-dimensional container.

Q 5. What is the difference between a DHL box and a UPS box?

A DHL and UPS boxes are similar in design but differ in their internal structure and labeling. DHL boxes are designed for international shipping and often include a DHL label, while UPS boxes are designed for domestic shipping and include a UPS label.

Q 6. What is the difference between a BV box and a CP65 box?

A BV (Bureau Veritas) and CP65 (California Proposition 65) boxes are used for hazardous materials. BV boxes are used for international shipping, while CP65 boxes are used for shipping within California.

Q 7. What is the difference between a wooden pallet and a styrofoam pallet?
